2015 IFC and IBC Fire Protection Systems

Friday March 24th 2017

Legal Aspects of Code Administration

Description: Thursday - 2015 IFC and IBC Fire Protection Systems

Upon completion of this seminar, participants will be better able to:

- Explain why a fire protection system must conform to code criteria and referenced standards.
- Determine where and when fire protection systems are required.
- Explain the principles of how a fire protection system detects and manages a fire.

This seminar provides code officials and design professionals with:

- An understanding of the Chapter 9 fire protection system requirements in the 2015 IFC and IBC.
- The design and operation of various fire-extinguishing and fire detection and signaling systems.
- A review of the applicable NFPA standards for fire protection systems.
- The requirements for the inspection and maintenance of fire protection systems.

Description: Friday – Legal Aspects of Code Administration

Upon completion, participants will be better able to:

- Utilize introductory information to motivate further study of the legal aspects of code administration.
- Establish or document rules of procedure used before a board of building code appeals.
- Examine theories of legal liability.

This Seminar Provides code officials with guidelines for administering the legal aspects of codes with regard to enforcement, prosecution and maintenance. In this course participants will discuss historical consequences of ignoring the regulation of building construction and materials, and learn how to interpret and applying local government, state and federal legislative laws, pertaining to the administration and enforcement of a building code

Instructor for Thursday and Friday – James D. Quigley, M.C.P.

8 a.m. to 4 p.m. March 23rd & 24th (lunch provided both days)

ICC Continuing Education Credits are available both days, includes workbook
