2018 IBC Care Facilities Provisions

Friday September 13th, 2019

2018 IBC Use of Fire Sprinkler and Alarm Systems
2018 IBC Mixed Occupancies

2018 IBC Care Facilities Provisions (.6 CEU's)

This seminar will address provisions in the 2018 International Building Code® and referenced standards relating to the design and construction of care facilities, such as medical care, custodial care, ambulatory care and day care facilities. It will focus on the specific decision making needed to apply the provisions appropriately by highlighting the differences between the various types of care activities. The seminar will include a discussion on how the length of stay, number of care recipients, degree of care and capability/incapability of self-preservation all relate to the occupancy classification and resultant code requirements. Smoke compartments, dwelling and sleeping unit separations, incidental use separations and other special conditions provisions are also addressed. Unique provisions will be highlighted in the areas of accessibility, type of construction, fire protection, means of egress and interior finishes. During this seminar, participants will listen to lecture, discuss examples and participate in activities that pertain to applying sections of the IBC to care facilities.

2018 IBC Use of Fire Sprinkler and Alarm Systems (.3 CEU's)

This seminar identifies those conditions under which automatic sprinkler protection and/or fire alarm systems are required. The application of the fire area concept will be discussed, along with the varying extent of sprinkler protection required based upon specific situations. In addition, the discussion will address many of the key code conditions under which the presence of an automatic sprinkler system can be used to modify other requirements. Specific topics include: Overview of fire protection systems, Definition and application of fire areas, Required sprinkler and alarm protection based on occupancy classification, Optional use of automatic sprinkler systems.

2018 IBC Mixed Occupancies (.3 CEU's)

Based on the provisions of IBC Section 508, this seminar addresses those special requirements applicable to buildings containing two or more occupancy classifications. The three mixed-occupancy options are presented along with examples and exercises that illustrate the proper application of the provisions.

Specific topics include: Occupancy classification, Mixed occupancy conditions, Accessory occupancies, Non separated occupancies, Separated occupancies and Multi-story conditions

8 a.m. to 4 p.m. September 12th & 13th (lunch provided both days)
.6 ICC Continuing Education Credits are available both days, includes workbooks
